Service

Fixed line telephony

Marketing numbers are virtual numbers that are routed to one or more predefined destinations based on various criteria such as language, origin of the call, day and time of the call, a voice menu or a combination of these criteria.

For a 0800 number the caller pays nothing as long as he or she calls from a Belgian fixed or mobile network that uses the same interconnection rates as Proximus.

In addition to the rental fee for the marketing number, the number holder is also billed for the traffic linked to the number, depending on the duration, the origin of the call, the destination and the use of the various routing possibilities. A Marketing number is always associated with a pricing plan. The price of the calls (set price/min) also depends on the volume of the call.

Each tariff plan has a monthly subscription that is equal to the call credit linked to that tariff plan. Unused call credit is transferred once to the next month.
