Service

Fixed line telephony

Marketing numbers are virtual numbers that are routed to one or more predefined destinations based on various criteria such as language, origin of the call, day and time of the call, a voice menu or a combination of these criteria.

For 070 numbers, Proximus collects the money from end-users calling from a Belgian number. The money collected is paid in full to the number holder.

For a 070 number, the caller pays a uniform rate for all operators, provided he or she is calling from a Belgian fixed or mobile network that uses the same interconnection rates as Proximus.

The level of remuneration linked to a given number is 0.15€/min or 0.30€/min depending on the choice of the number holder.

The level of remuneration corresponds to the rate applied to the caller.

In addition to the rental fee for the marketing number, the number holder is also billed for the traffic linked to the number, depending on the duration, the origin of the call, the destination and the use of the various routing possibilities. A Marketing number is always associated with a pricing plan. The price of the calls (setup + price/min) also depends on the volume of the call.

Each tariff plan has a monthly subscription that is equal to the call credit linked to that tariff plan. Unused call credit is transferred once to the next month.

The number holder, and therefore the service provider, is subject to the Code of Conduct for 070 and 090x numbers: <http://www.proximus.be/codeofconduct>
