# Fixed & wireless networks (LAN/WLAN)

## A future-oriented network with maximum uptime

Is your company network becoming too slow due to the growing number of users, applications and devices? Do you want to respond to the increasing digitization? Then it's time to upgrade your network. We'll be happy to advise you on this and we can deliver, install and maintain the infrastructure to ensure a fast and reliable network. This way you'll enter the digital era without a worry.

### Ready for tomorrow

Digitization is in full swing. Digital collaboration, Internet of Things, video surveillance, cloud applications, etc. All those new applications help your employees become more productive and your company more efficient, but they place high demands on your network. Your new network lets you integrate those applications in no time, with the required attention for security. What's more, this network solution grows in step with your organization. The result: your investment also pays off in the long term. More than that, you can easily combine our network solutions with other solutions from our portfolio. This way you'll be completely ready for tomorrow.

### High performance

The new network infrastructure ensures a fast and flawless flow through of data traffic. So, you can connect a large number of different devices easily and securely.

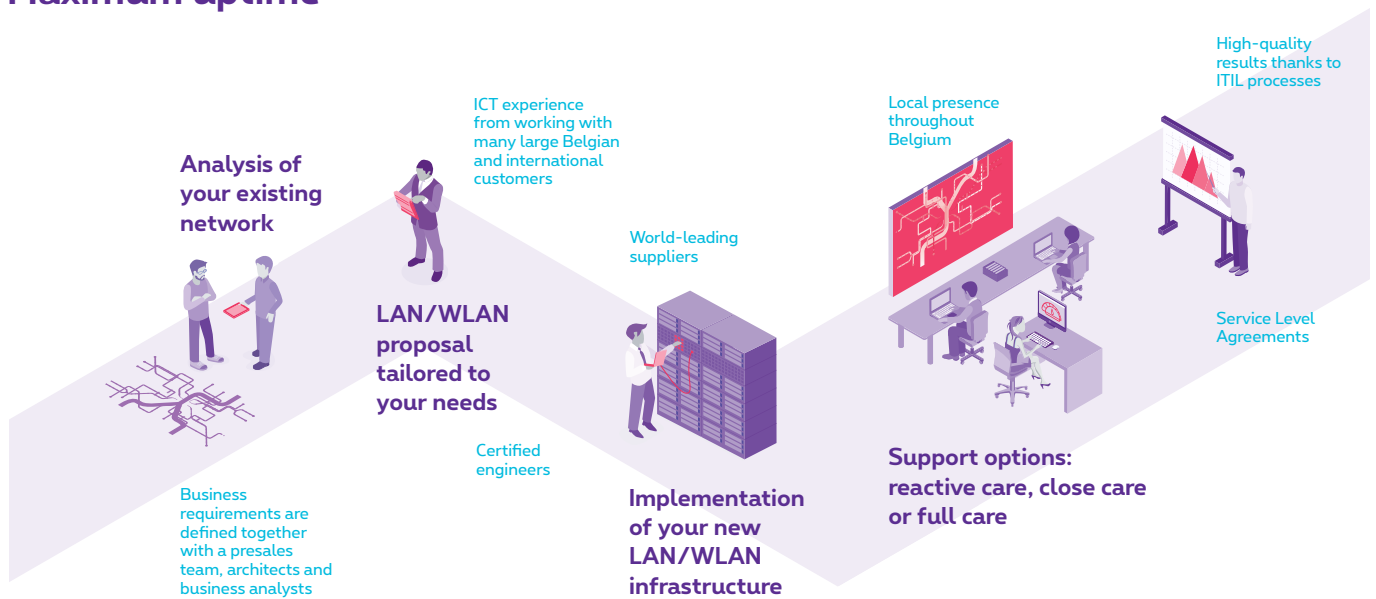

### Each their own access

You want access for certain users, separated from you corporate network? That's perfectly possible. Simply define separate segments for different user groups: own employees, customers, visitors, students, external employees, etc.

### For digital workplaces

Are your users spread out across different departments or buildings? Don't worry, your new network is designed for this. Do they prefer mobile working with a laptop, tablet or smartphone? Thanks to the different types of access points, every mobile user surfs at a comfortable speed.

## Maximum uptime

### With a future-oriented LAN network:

- You are ready for further digitization with applications such as Internet of Things, digital collaboration and working in the cloud.
- You are ready for the latest applications and do you get a better user experience and a better service thanks to the fast response time.
- You spend less time on solving problems and more time on innovation.

### We offer:

- A solution from A to Z: connectivity, network, cloud, security, fixed and mobile telephony.
- Support with installing and maintaining those solutions.
- Many years of experience and continuous investments in upgrading our offer.
- Local specialists throughout Belgium for rapid assistance in case of need.
- High-quality hardware thanks to the partnership with the best suppliers.
