

Forum Connect Forum VConnect

A flexible and versatile communication and collaboration solution specially designed to meet the requirements of any company.

Communication server Connections

Forum Connect is a communication and collaboration platform that perfectly meets the needs of any company!

Forum Connect is ready to support the new generation of cloud-based applications such as the ForumC Mobile & Web App, thanks to the CloudLink platform integrated as standard.

Two versions, two capacities.

Forum Connect supports capacities up to 200 users. The SMB Controller can be extended with interface cards and system modules. It is delivered with a fully equipped CPU module, 6 analogue terminal interfaces and 4 Gbit/LAN connections. A single hardware unit that can be installed on the wall or in a 19" rack.

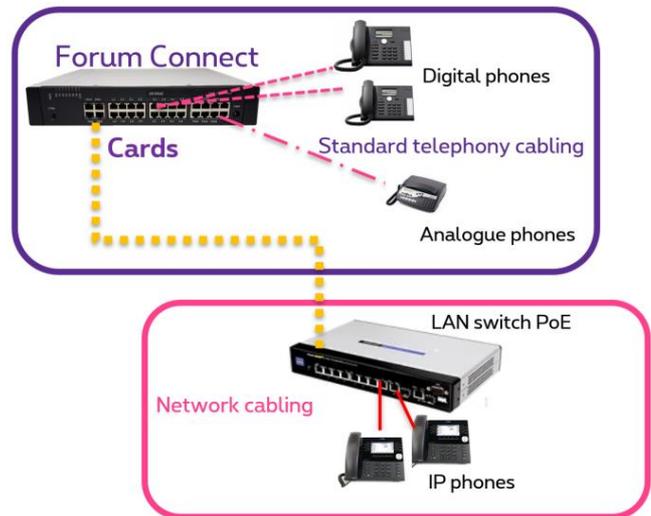

Forum VConnect is server based and supports capacities up to 1200 users.

Do you need a high capacity of digital or analog phones? Forum Connect can be coupled with Forum VConnect to meet this need.

Forum Connect is an ideal solution, even for companies with high requirements regarding flexibility and connection of remote sites.

The Forum (V)Connect platform works with SIP, IP, digital and analogue devices. The entire range of Forum Connect devices offers a multitude of possibilities.

The big difference is the cabling required for installation. Digital and analogue devices are connected to the telephone exchange with standard telephone wiring. They are connected via cards that are placed in the system. They are powered by the telephone exchange.

IP devices require minimum cat5E network cabling. They are connected to a Lan switch. Proximus supplies Lan switches that are PoE, i.e. they are suitable for powering IP devices.

Whatever your preference, Proximus has for the solution!

IP telephones of the 6900 series

The 6900 Series IP phones and accessories combine stylish, modern styling with outstanding audio quality and a wide range of new features, such as Bluetooth wireless handset and the mobile integration feature set. The 6900 series includes four high-end phone models.

Outstanding sound quality

Hi-Q high-definition audio technology ensures exceptional voice clarity. The 6900 Series handset delivers voice-optimised audio quality for clear conversations in any environment, whether in the middle of an open-plan office or in a retail outlet. A wireless version of this innovative handset is supplied as standard on the 6940 model. The 6900 series IP telephones feature an enhanced full duplex handsfree mode with a sealed acoustic chamber that provides excellent audio performance. Users will appreciate the superior audio experience offered by the 6900 IP phones.

MobileLink

The MobileLink feature allows the user to pair his mobile phone directly to his office phone via the integrated Bluetooth 4.1 interface. Calls to the mobile phone can be picked up on the desk phone just like any other call, taking advantage of the superior audio performance and ergonomics of the device. The

mobile phone contacts can be synchronised with the IP phones 6930 and 6940, allowing access to the same contacts on the desktop terminal. MobileLink is available as a standard feature on the ForumC 6930 IP Phone and ForumC 6940 IP Phone models, which also include a powered USB port for charging a mobile phone.

ForumC 6920 IP Phone

Flexibility and reliability

The ForumC 6920 IP Phone has been designed for the user who is looking for flexibility and reliability and who wants a phone with a modern design. The ForumC 6920 IP Phone offers HD audio quality thanks to its voice-optimised handset, high-quality full-duplex hands-free mode and support for USB, EHS/DHSG and analogue headsets. The ForumC 6920 IP Phone offers an intuitive user experience via its high-resolution 3.5" colour LCD display. The 6 programmable keys and 4 context-sensitive buttons allow the programming of 38 easily accessible functions or numbers.

ForumC 6930 IP Phone

ForumC 6930-L IP Phone

High performance for intensive users

The ForumC 6930 IP Phone is a high-performance, customisable phone for intensive users. The MobileLink feature makes the ForumC 6930 IP Phone the ideal companion for the user's smartphone. The 6930 model offers users the flexibility to customize the phone to their specific needs through a wide range of complementary accessories. The 6930 supports Bluetooth, USB and analogue headsets. Compatible with today's high-speed networks via two Gigabit Ethernet ports, the 6930 features a large, backlit 4.3" colour LCD display with HD wideband audio quality and advanced audio processing. The 12 programmable keys and 5 context-sensitive keys allow the configuration of 72 easily accessible functions or numbers.

On the ForumC 6930-L IP Phone Bluetooth is not supported.

ForumC 6940 IP Phone

The power of touch

The 6940 telephone is designed for executives requiring an exceptional terminal to meet their increased communication requirements. MobileLink makes the ForumC 6940 IP Phone the ideal companion for the user's smartphone. The 6940 offers users the flexibility to customize the phone to their specific needs through a wide range of complementary accessories. The 6940 has been designed to deliver HD audio quality thanks to its exclusive wireless handset with a range of up to 10 metres, enhanced full-duplex hands-free mode and support for Bluetooth and USB headsets. Compatible with today's high-speed networks via two Gigabit Ethernet ports, the 6940 features an extra-large 7" colour LCD touch screen, HD wideband audio quality with advanced audio processing, 96 programmable keys and six context-sensitive softkeys.

The accessories

- **Key module display**

Programmable buttons: 28 with 3 levels.

Max.3 per phone

- **ForumC Dect headset module**

This module is supported on ForumC 6930 IP Phone (also the L version) and the ForumC 6940 IP Phone.

The integrated DECT headset allows users to detach themselves from their desk and enjoy the increased productivity that wireless communication brings. The unique base of the headset attached to the phone reduces desktop clutter and reduces the solution footprint compared to standalone wireless headset solutions. In addition, the fact that the base is powered by the phone eliminates the need to find an available

power outlet. The integrated DECT headset provides an extended range of up to 100 metres of mobility. With up to 15 hours of battery life, users can benefit from a battery that will last the entire working day

SIP Phone of the 6800 series

ForumC 6863i IP Phone

For low telephone requirements

The entry-level model. This 2-line SIP phone has a 2.75" monochrome graphic LCD screen and 3 programmable physical keys. Ideal for professionals with low telephone requirements and as a wall-mounted telephone.

The digital phones

ForumC 5361

For low telephone requirements

Its monochrome display, 10 easy-to-program function keys and ease of use thanks to the Foxkey and navigation key ensure a high level of user comfort. Thanks to its wall-mountable base, it is ideal for use in maintenance rooms and workshops.

ForumC 5370

High performance for intensive users

Intuitive operation and excellent sound quality. Integrated phone book, hands-free function and conferencing are just a few examples of its many functions. The standard DHSG headset interface supports call functions (volume adjustment, off-hook/on-hook) directly from the headset. Juggling between incoming calls is child's play and the 12 programmable keys make it easy to transfer to colleagues.

ForumC 5380

The power of a keyboard and extension keys

The ForumC 5380 integrates elegantly into any working environment. It meets the highest demands in telephony and helps to increase communication efficiency. Its comfortably sized integrated alphanumeric keypad and additional key modules contribute to productivity. When used with a headset, it is an ideal workstation for telephone reception.

Accessories

Expansion key modules provide easy access to many numbers or functions. The ForumC 5370 allows the connection of one extension module and the ForumC 5380 of 3 extension modules.

Two types of extension modules can be used:

- Expansion module (paper): 20 programmable double-entry keys
- Expansion module (display): 15 programmable triple input keys

DECT cordless phones

In a company, remaining reachable even when you are on the move is essential. The wireless DECT telephone solution improves the efficiency of your employees who always stay connected. Employees can move around the company answering all calls, a major asset to improve the quality of your customer service. Employees find the same functionalities as on a fixed office terminal (call transfer, conferences...). So if one of the employees is busy, another free employee will be able to answer in the colleague's place, thus reducing the customer's waiting time.

Forum Connect supports up to 256 IP Dect bases. Forum VConnect up to 4096 IP Dect bases. The bases are powered by PoE Lan switches.

The base exists in a standard version and in a version combining voice and Wifi in a single base. The bases can be installed indoors or outdoors. In order to define the number of Dect bases necessary to guarantee the coverage Proximus will perform a Dect measurement.

We offer you 3 types of Dect handsets adapted to your needs and to any environment: normal office, a laboratory, a garden centre, a fashion shop, a hospital or a manufacturing plant. Backlit screen and keyboard, intuitive and user-friendly menu guidance, headset connection, ...

The choice is yours!

ForumC 612 D

The Dect 612 handset easily adapts to the habits of individual users and meets their communication needs. Freely programmable keys, 52 ring tones and a colour TFT display guarantee a clear overview and ease of use. Other user-friendly features include access to the company directory, a local phone book with up to 350 contacts (each with three entries) and a connection for the headset.

ForumC 622 D

Its large colour TFT screen provides an excellent graphic display for optimal readability. Freely configurable keys simplify navigation. The 622D model offers optimum freedom of movement thanks to the Bluetooth interface available for wireless headset use. Its lithium-ion battery can be charged via the charging station or the USB interface. You won't miss a call thanks to the integrated vibrating buzzer.

ForumC 632 D

The 632D model is a ruggedized DECT business phone designed for use in demanding work environments. It meets the IP65 industry standard and can also be used outdoors or in production facilities. With its built-in sensor alarm, the Model 632D is not only ideal for use in healthcare facilities, but also for security professionals or prison environments.

We can offer you a wide range of headsets.

Some applications

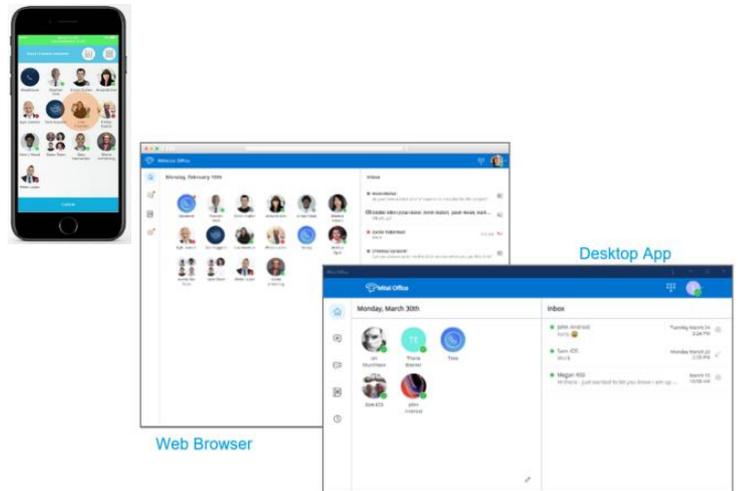

ForumC Mobile & Web App

It is more essential than ever to enable your employees working at the office or remotely to collaborate more easily and efficiently, regardless of their location and way of working. The ForumC Mobile & Web App is the first mobile unified communications application designed for small and large businesses. The mobile application allows users to stay connected to their business with ease and never miss a call. Based on the CloudLink platform, the application offers essential desktop telephony features, secure chat and presence, and dynamic contact management. A single licence offering at the same time the integration of the

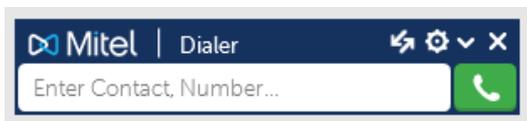

smartphone (one number concept) and a Web Softphone compatible with Windows PC and MAC!

Stay accessible wherever you are!

Because YOUR accessibility is important for the success of your business!

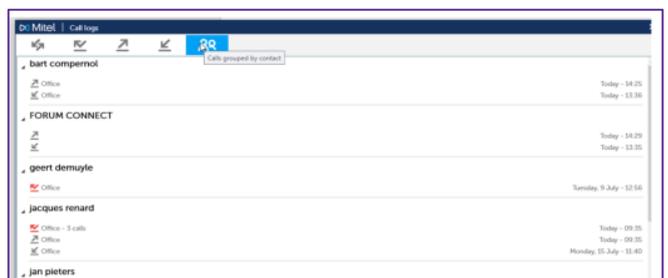

ForumC Dialer

A simple application to make a call (= click-to-dial) from an Outlook contact, a website ...

Work more efficiently!

Softphone 2380

The ForumC MiVoice 2380 softphone for Windows PCs offers PC-based telephone functions for convenient operation. It can be used with a mouse and keyboard. To make and receive calls, only a headset (USB, wireless or Bluetooth) connected to the computer is required. All important functions, such as call logs and phonebook, can be accessed with one click. The softphone offers all logical and possible options during a call, such as audio conferencing, transfer and redial. The extension module allows you to view your colleagues' telephone occupancy and status. Do you want to use the softphone at home? This is possible if you have a VPN (Explore).
