1. Introduction

- 1 The present annex illustrates the general pricing principles and pricing structure that may be used in setting pricing for use of Proximus underground GPON sub-ducts infrastructure in regard of the Proximus Reference Offer for Duct Access, and as can be determined at this stage.
- 2 Any prices in this Price List are in Euro and are VAT exclusive.
- 3 The structure and prices of the below Price List are subject to further adaptations.
- 4 Proximus shall have the right to adjust once in each calendar year all charges applicable to the present Reference Offer by X% (compounded annually and determined as explained below in this paragraph), according to the following formula:

$$P1 = PO + (PO * X\%)$$

P1 = the new price (applicable as from 1 January of the following calendar year)

PO = the current price as applicable during the previous year, i.e. the price last applied

X% = the adjustment value

The adjustment value will be fixed at 1,9% adjusted for the relevant year in case during each of two consecutive years, 80% of the year-on-year evolution of the reference wages ("Referteloonkost Manufacturing") as published by Agoria deviates downwards by more than 0,5% from 1,9% (i.e., if the 80% of each of those two year-on-year evolutions is lower than 1,4%).

In case of such negative deviation during each of two consecutive years, the fixed escalator is adjusted for the year concerned to the average of 80% of the year-on-year evolution of the reference wages ("Referteloonkost Manufacturing") as published by Agoria each of the two preceding years concerned and is adjusted for the following year to the average of 80% of the year-on-year evolution of the reference wages ("Referteloonkost Manufacturing") as published by Agoria for each of the two preceding years, up to 1,9%.

The price adjustment will be applied as from 1 January of the relevant calendar year to which the indexation applies with a two (2) months' notice period and cannot be applied retroactively and will be applicable for the first time for the establishment of the prices that will be valid in 2027.

- 5 When relevant in the light of cost evolution, the adjustment value can be adapted with a prior approval by the Monitoring Trustee.

2. Pricing

2.1 Pre-provisioning

2.1.1 Obligatory testing of fibre cables used in Proximus ducts

ITEM	EUR	UNIT
Testing of fibre cables used in Proximus ducts. This action is performed one time per cable type, in order to verify that the cable used by the Beneficiary is compatible with Proximus infrastructure. This covers product documentation analysis and effective testing in lab environment.	169,32 €	Per type of fiber cable used by the Beneficiary

2.1.2 Presence & Availability Request (NIS9 pre-study)

ITEM	EUR	UNIT
Consultation and verification in Proximus documentation, based on a first set of engineering and availability rules by network planners, on expected Available Subducts in a whole NIS9 area, taking into account future legitimate use according to e.g. the deployed FTTx environment & technical characteristics.	Manual process: 46,45 € Automated process: - included in the price of 20 € per NIS9 area; or - 28,28 € in the event of ad hoc requests	Per Request for a whole NIS9 area

2.2 Ordering & Provisioning

2.2.1 Feasibility Study and Design

ITEM	EUR	UNIT
------	-----	------

Calculation of foreseen one-time cost for - detailed analysis of the Subduct Access Construction Area applying and verifying the full set of availability and engineering rules - preparing the detailed design of the solution identifying Entry and Exit Points, By-Pass or Pass-Through implementation.	69,67 €	Per Request For Design
--	---------	------------------------

2.2.2 One-off Project fee

ITEM	EUR	UNIT
Coordination and delivery management: coordination meeting/activities for different Proximus teams internally & with Beneficiary, field testing file for contractor, finding & order a contractor for testing & construction activities, control as-built documentation from contractor & payment, supervision of quality testing, update documentation with connectors & Beneficiary segment identification for repair	255,47 €	For 10.000m2 Subduct Access Construction Area for dense areas as defined per Statbel or 30.000m2 Subduct Access Construction Area in other areas.
Coordination and delivery management pre-infrastructure survey	820,10 €	For 10.000m2 Subduct Access Construction Area for dense areas as defined per Statbel or 30.000m2 Subduct Access Construction Area in other areas.
Coordination and delivery management for installations		
Extra delivery management fee in case of discontinuous work	208,33 €	Per additional request

related to one additional request in same Subduct Access Construction Area		
--	--	--

[Note: In order to realise a project for duct access some general costs to coordinate the project end-to-end will need to be compensated]

2.2.3 Entry/Exit points feasibility study and design

ITEM	EUR	UNIT
This entails the study & set-up of the construction plan (placing of connector & identification of which sub-duct(s)) towards Proximus' contractor & supervisor	23,23 €	Per Entry and Exit point

2.2.4 Pass-Through connections study and design

ITEM	EUR	UNIT
Study & set-up construction plan with instructions on how to perform connection within the manhole to be passed-through & which sub-duct(s) towards Proximus' contractor & supervisor	46,45 €	Per Entry/ Exit point

2.2.5 Site survey

ITEM	EUR	UNIT
Field survey executed during the calibration test at location (of Entry/Exit points) with the Beneficiary.	185,79 €	Per location (10.000m2 or 30.000m2 Subduct Access Construction Area).
Check of subduct quality and usability through sondage test (when possible) – fixed costs .	494,97 €	Per location (10.000m2 or 30.000m2 Subduct Access Construction Area)

Subducts installed in the ground may have been damaged and rendered non-operational for reasons beyond Proximus' control (work carried out by third-party operators and utility companies, flooding, damage by rats, etc.).

It is performed by probing (sondage test) through access via one manhole.

The fee for the fixed costs is charged only for the testing of the first subduct on a given Trajectory. For the testing of additional subducts at the same time on the same Trajectory, only the fee for the variable costs will apply (based on the tested length of the subduct).

Subducts installed in the ground may have been damaged and rendered non-operational for reasons beyond Proximus' control (work carried out by third-party operators and utility companies, flooding, damage by rats, etc.).

When possible, a quality and usability test is carried out before using said subducts, both for its own needs and for rental purposes.

It is performed by probing (sondage test) through access via one manhole.

Extra fee for sub-duct quality and usability test in case of discontinuous work related to one additional request in same

Per meter

208,33 €

Per additional request

Subduct Access Construction Area.		
-----------------------------------	--	--

2.2.6 Installation of Entry/Exit points

ITEM	EUR	UNIT
Installation Lead-In of L type and connection to Beneficiary infrastructure	35,87 €	Per item
Installation Lead-In of T type and connection to Beneficiary infrastructure	35,87 €	Per item

2.2.7 Installation of Pass-Through connections

ITEM	EUR	UNIT
Installation of connection between two subducts in Proximus manhole	35,87 €	Per item

2.3 (Monthly) Rentals

The rental of subducts in SRV Underground Deployments is subject to a rental contract of at least 5 years.

At start of the contract, a price per meter subduct is due to cover the rental of the first period of 5 years.

A monthly fee per meter is due during the subsequent period of the contract.

The prices are defined for (i) "standard" NIS-9 sectors, i.e. with an average cost structure, and (ii) "non-standard" NIS9 sectors, i.e. sectors which are more expensive and have higher costs for the deployment of network infrastructure.

The list of NIS-9 sectors is available in section 2.6.

Prices for 2,3 or 4 subducts only apply when the subducts are ordered at the same time.

Standard NIS-9 sectors (#nis:2552) (VAT Exclusive)		
	For the initial period of 5 years (€/meter/5 years)	For the subsequent period (€/meter/month)
1 subduct - side way	8,23	0,153
2 subducts - side way	11,85	0,221
3 subducts -side way	15,46	0,288
4 subducts - side way	17,54	0,327
per additional subduct after 4 subducts - side way	0,53	0,010
1 subduct - street crossing	14,37	0,268
2 subducts - street crossing	20,44	0,381
3 subducts - street crossing	26,50	0,494
4 subducts - street crossing	29,80	0,555
per additional subduct after 4 subducts - street crossing	0,53	0,0099

Non-standard NIS-9 sectors (#nis:286) (VAT Exclusive)		
	For the initial period of 5 years (€/meter/5 years)	For the subsequent period (€/meter/month)
1 subduct - side way	16,22	0,302
2 subducts - side way	23,04	0,429
3 subducts - side way	29,87	0,556
4 subducts - side way	33,56	0,625
per additional subduct after 4 subducts - side way	0,56	0,010
1 subduct - street crossing	26,73	0,498
2 subducts - street crossing	37,76	0,703
3 subducts - street crossing	48,79	0,909
4 subducts - street crossing	54,59	1,017
per additional subduct after 4 subducts - street crossing	0,56	0,0104

Notes:

1. Subducts in SRVs are not accessible during a **first year moratorium period** after the ending of the civil works for the deployment of these (sub)ducts.
2. Finally, monthly fees apply for the total length of the SRV in which a subduct is ordered

2.4 One off costs for specific interventions

Intervention actual cost is calculated per commenced half an hour increased with the markup for overhead (5%) and IT (7,5%).

2.4.1 Intervention Proximus to deblock Beneficiary blowing fiber cables

ITEM	EUR	UNIT
Intervention Proximus to deblock	Intervention actual costs	Per intervention

2.4.2 Repair following damage by third party to subduct used by Beneficiary

ITEM	EUR	UNIT
Repair following damage by third party	Intervention actual costs	Per intervention

2.5 Service cancellation

Intervention actual cost is calculated per commenced half an hour increased with the markup for overhead (5%) and IT (7,5%).

2.5.1 Repair into original state at contractual end, annulation or non-payment of pricing elements

ITEM	EUR	UNIT
Removal of Lead-In and restoration of subduct integrity	Intervention actual costs	Per Entry/Exit point
Removal of subduct connection in Proximus manhole	Intervention actual costs	Per connection
Removal of Beneficiary cable from Proximus subduct	Intervention actual costs	Per subduct segment
Additional work for restoration of Proximus infrastructure	Intervention actual costs	Per intervention

[Note: Where a duct can not be restored in original state and becomes unavailable for re-use, the goodwill related to the asset will be borne by the Beneficiary.]
