

# MySense, one solution to satisfy all your needs

In an increasingly connected world, a natural need for gathering data arises. A multi-purpose sensor offers the ideal answer. One solution that creates real value for any type of business, easy to integrate in current systems and offers a long battery lifetime thanks to the Proximus IoT network and services.

# One sensor, many opportunities

MySense is a small (H: 27 mm - L: 48mm - W: 25mm) multi-functional sensor that brings the flexibility to gather the data you are searching for. It can **detect its movement**, the **temperature**, and comes with a **push button** as well as an **LED light (green, red and orange)**.

## Some of the functionalities?

Push button

Temperature

Immobilisation

Inclination

Counting wheel turns

Shock detection

Motion detection

Duration (in)activity

### MySense is a multi-purpose sensor that enables many applications and services.

- Man at work assistant
- Object moving tracking
- Detecting damage to assets
- Request for help button
- Temperature monitoring of consumables
- And many more
