Table of contents 3

1 Important

Take time to read this user manual before you use your telephone. It contains important information and notes regarding operating your telephone.

1.1 Power requirements

- This product requires an electrical supply of 220– 240 volts, alternating monophased power, excluding IT installations defined in standard EN 60-950. In case of power failure, the communication can be lost.
- The electrical network is classified as hazardous according to criteria in the standard EN 60-950. The only way to power down this product is to unplug the power supply unit from the electrical outlet. Ensure the electrical outlet is located close to the apparatus and is always easily accessible.

 The voltage on the network is classified as TNV-3 (Telecommunication Network Voltages), as defined in the standard EN 60-950.

Warning

- This equipment is not designed to make emergency calls in the event of a power failure. An alternative has to be made available to allow emergency calls.
- High voltage. Never open the product or attempt any repair.
- Keep the product away from liquid.
- Never use any battery type other than the one supplied.
 There is a risk of explosion if the batteries are replaced by an incorrect type.
- When the phone is ringing avoid holding the earpiece too close to your ear as it may damage your hearing.
- Do not use the product in places where there are explosive hazards.

- Do not let small metal objects come into contact with the product. This can deteriorate audio quality and damage the product.
- Handsfree activation could suddenly increase the volume in the earpiece to a very high level: make sure the handset is not too close to your ear.
- Refer also to the Cautions in chapters and subchapter sections.

The advanced features may not be available if you use another handset than a Twist 308/318 with your base station. To register and use your Twist 308/318 handset with a GAP standard base station of a different make, first follow the procedure described in the manufacturer's instructions, then follow the procedure described on page 35.

To register a handset of another make to the Twist 308/318 base station, place the base station into registration mode, then follow the procedure in the manufacturer's instructions.

1.2 Using GAP standard compliance

The GAP standard guarantees that all DECT™ GAP handsets and base stations comply with a minimum operating standard irrespective of their make. Your handset and base station are GAP compliant, which means the minimum guaranteed functions are: register a handset, take the line, receive a call and dial.

1.3 Recycling and disposal

Disposal instructions for old products

The WEEE directive (Waste Electrical and Electronic Equipment; 2002/96/EC) has been put in place to ensure that products are recycled using best available treatment, recovery and recycling

techniques to ensure human health and high environmental protection.

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused. Do not dispose of your old product in your general household waste bin.

Inform yourself about the local separate collection system for electrical and electronic products marked by this symbol:

Use one of the following disposal options :

1 Dispose of the complete product (including its cables, plugs and accessories) in the designated WEEE collection facilities. 2 If you purchase a replacement product, hand your complete old product back to the retailer. He should accept it as required by the WEEE directive.

Disposal instructions for batteries

Batteries should not be disposed of with general household waste.

Packaging information

Belgacom has marked the packaging with standard symbols designed to promote the recycling and appropriate disposal of your eventual waste.

A financial contribution has been paid to the associated national recovery and recycling system.

The labelled packaging material is recyclable.

1.4 Environmental information

The equipment that you bought has required the extraction and use of natural resources for its production. It may content hazardous substances for the health and the environment. In order to avoid the dissemination of those substances in our environment and to diminish the pressure on the natural resources, we encourage you to use the appropriate take-back systems. Those systems will reuse or recycle most of the materials of your end life equipment in a sound way.

The crossed-bin symbol invites you to use those systems.

If you need more information on the collection, reuse and recycling systems, please contact your local or regional waste administration. You can also contact us for more information on the environmental performances of our products.

- 1 Press on the base.

 All handsets ring.
- 2 Press again to cancel the paging call or press any key on the handset to stop the paging call.

Standby mode

If you do not press any button on the handset for 15 seconds the display will automatically return to standby. It will also return to standby when the handset is placed on the base or charger.

2.6 Menu navigation

The basic steps of navigating through the menu and on-screen options.

From the standby screen, press menu.

- The main menu is opened.
- 2 Use the and keys to scroll through the menu.
- Soft key options OK and BACK are displayed.
 Press to select OK and option.
 Press to select BACK and go back to previous menu level, correct a character or cancel an action.
- 4 Press to return to standby.

3 Getting started

3.1 Position the base

Place the base within reach of the telephone line and electricity sockets.

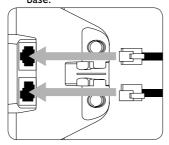

❸ Tip

The position in which you place the base can have an effect on the range and performance of your product. Avoid placing the base too close to large metal objects such as filing cabinets, radiators or electrical appliances. This can impair the range and sound quality. Buildings with thick internal and external walls may impair transmission of signals to and from the base.

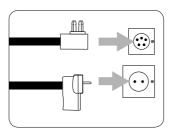

3.2 Connect the base Marning

 Make sure you connect the power adaptor and telephone line cord correctly as incorrect connection could damage the product.

- Always use the telephone line cord supplied with the unit. Otherwise you may not get a dial tone.
- 1 Plug the line cord and the power cable into the sockets at the back of the base.

2 Plug the other ends of the line cord and power cable into the telephone socket and mains power socket.

14 Getting started

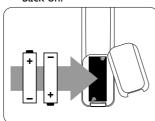

3.3 Install and charge the handset batteries

Warning

- The handset must be charged for at least 24 hours before using it for the first time.
- Never use any battery type other than the one supplied.
 There is a risk of explosion if the batteries are replaced by an incorrect type.

Your Twist 318 is supplied with two rechargeable batteries.

- Slide off the battery door (if fitted).
- 2 Insert the batteries as indicated and slide the door back on.

- Place the handset face up on the base to charge. A beep confirms the handset is placed correctly and charging will begin.
- 4 When there is enough power in the batteries, the handset will automatically register with the base. The standby screen is displayed. Or if the display shows #ELEOME: you must select your language.
- Press The language is shown on the display.
- Press or to select your language then press represent.
- Press to go back to the previous screen.

Note

 If you receive a call before the language is set, you can take the call. When the call is ended the display returns to the original screen ready for you to set the language.

- If you make a mistake when choosing your language, please refer to 'Display language', on page 32.
- batteries are fully charged (at least 24 hours).

 The handset batteries are fully charged when the charging animation stops and the [11] (battery charged) icon is displayed.

Warning

If you insert alkaline batteries instead of the NiMH batteries WARNING BATT will appear on the display. Replace immediately with the batteries supplied.

3.4 Using multipacks

If you have purchased a multipack you will have additional handsets, chargers, power adaptors and AAA rechargeable batteries.

- Plug the chargers into a power socket.
- Install the batteries supplied into the other handsets.
- Place the handsets on the chargers to fully charge the batteries for at least 24 hours.

16 Getting started

Using your Twist 318

4.1 Calls

4.1.1 Make a call

- 1 Press .
- 2 Dial the telephone number.

4.1.2 Pre-dial

- 1 Enter the phone number (maximum 24 digits). If you make a mistake
- number entered.

4.1.3 Dial one-touch numbers 1 and 2

1 Press and hold or until the number is displayed and dialled. If no number is stored, you hear a beep.

4.1.4 Call from the phonebook

- 1 Press " The first entry in the phonebook is displayed.
- 2 Scroll or to the
- entry you want.

 3 Press to dial the number.

❸ Tip

Instead of scrolling to browse the phonebook entries, press the numeric key corresponding to the first letter of the entry you wish to locate. For example,

pressing 2 will show the entries starting with ${\bf A}.$ Pressing 2 again will show the entries starting with \boldsymbol{B} , etc...

4.1.5 Call from the call log

- 1 Press The first entry in the call log is displayed.
- 2 Scroll or to the entry you want.
- Press to dial the number.

⊜ Note

You need to subscribe to Belgacom Caller Line Identification service to be able to see the caller's number in the call log. See 'Call log' on page 25 for more details.

4.1.6 Answer a call

1 The phone rings and (flashes in the display. Press or press to answer the call via the loudspeaker.

♠ Warning

When the phone is ringing, avoid holding the earpiece too close to your ear as it may damage your hearing. Handsfree activation can suddenly increase the volume in the earpiece to a very high level. Make sure the handset is not too close to your ear.

⊕ Tip

If Auto pick-up mode is on (see page 31), simply lift up the handset from its base to answer the call. The default setting is off, in which case you will need to press to answer a call.

⊜ Note

An incoming call has priority over other events. Whenever there is an incoming call, other status in progress such as phone setting, menu navigation, etc. will be aborted.

4.1.7 Adjust volume

1 During a call, press or to adjust the earpiece or loudspeaker volume.

The volume level is shown in the handset display.

4.1.8 Mute

Mute the microphone so that you can talk to someone else in the room without your caller hearing you.

During a call, press The microphone is muted.

2 Press again to turn the microphone back on.

4.1.9 End a call

1 Press exit

The call duration is displayed on the handset screen for about 5 seconds.

❸ Tip

If Auto hang-up mode is on (see page 31), simply replace the handset on the base to end the call. The default setting is **on**.

4.2 Switch handset on / off

- 1 Press and hold until the handset switches off.
- 2 Press and hold again to switch the handset back on.

4.3 Intercom

This feature is only available when there are at least two registered handsets. It allows you to make internal calls, transfer external calls from one handset to another and use the conference option.

4.3.1 Call another handset

- 1 Press int
 - If you have two handsets, the other handset is called automatically.
 - If more than two handsets are registered to the base, their numbers are displayed, e.g. INT 2345*. Enter the number of the handset you want to call, or press to ring all handsets.
- 2 Press exit to hang up.

⊜ Note

If the handset does not belong to the Twist 308/318 range, this function may not be available.

4.3.2 Transfer an external call to another handset

- 1 During an external call, press int.
 - Your caller is put on hold.
- Enter the number of the handset you want to call. If there are only two handsets, the other handset is called automatically.

When the other handset answers, announce the caller then press to transfer the call.

If the other handset does not answer, press int to talk to your caller again.

⊜ Note

Before transferring the call, the user is able to switch between both internal and external calls by the int key.

4.3.3 Three-party conference call

- 1 During an external call, press int.
 - Your caller is put on hold.
- Enter the number of the handset you want to call. If there are only two handsets, the other handset is called automatically.
- 3 When the other handset answers announce the call then press and hold into connect both calls.

 If the other handset does not answer, press into to talk to your caller again.

4 Press exit to hang up.

4.4 PhoneMail

Your Twist 318 displays ✓ when you have new messages.

Note

If the PhoneMail number is not pre-stored you can add a number, or overwrite the existing stored number. See 'Store a phonebook entry as a one touch number', on page 24.

4.4.1 Dial your PhoneMail service

The number is displayed and dialled. Follow the voice prompts to play, save and delete your messages.

Or

If the ☑ icon is displayed, press В to dial the PhoneMail number.

⊜ Note

You can turn off the ☑ icon. When viewing the calls log, press and hold .

lacksquare

Phonebook

The Twist 318 handset phonebook can store up to 100 names and numbers.

Note

Numbers can be up to 24 digits long and names up to 12 characters long. Entries are stored in alphabetical order.

View and dial phonebook entries **⊜** Note

The first time \Box is pressed, the display shows the name of any pre-stored one-touch network service numbers, e.g. PHONEMAIL.

- 1 Press . Display shows the first entry.
- 2 Scroll or to the entry you want.

Or

To search alphabetically, press then press the key with the first letter of the name, e.g. if the name begins with **N**, press 6 twice.

The display shows the first entry beginning with N. If required, scroll to the exact entry.

Press to dial the entry displayed.

5.2 Store an entry

- 1 Press menu. PHONEBOOK is displayed.
- 2 Press menu. NEW ENTRY is displayed.
- Press menu. ENTER NAME is displayed.
- Enter a name and press 5 Enter a number. Press menu
- to save. Press to return to
- standby.

⊜ Note

Cancel storing an entry by pressing at any time during the process.

21 Phonebook

5.3 Entering names

Use the alphanumeric keypad to enter names in the phonebook. See '5.4 Character map'.

For instance to enter the name 'Paul'.

- Press 7 once
- Press 2 once
- Press 8 twice
- L Press 5 three times

To enter a space, press Press to delete a character or press and hold to delete all characters.

5.4 Character map

Use the keypad to enter names and characters.

	Space		1	-	<	>	*
2 abc	Α	В	С	2			
3 def	D	Ε	F	3			
4 ghi	G	Н	I	4			
5	J	K	L	5			
6	М	Ν	0	6			

5.5 Enter a pause

If your Twist 318 is connected to a switchboard, you may need to enter a pause in a stored number. This gives the switchboard time to get an outside line. A pause is normally stored after the switchboard access code (e.g. 9).

1 When storing a number, press and hold # until the display shows P. Then continue storing the number.

5.6 View an entry

- 1 Press menu twice.
 2 Scroll to LIST ENTRY and press menu.
- Enter the first letter of the name to search alphabetically then scroll 😭 or 😷 to the exact entry.

Phonebook

- 4 Press to display the number.
- 5 Press to return to standby.

5.7 Edit an entry

- 1 Press .
- want to edit and press EDIT ENTRY is displayed.

 Press key again.
- Edit the name and press to confirm. Use to delete characters.
- Edit the number and press to confirm.
- 5 Press to return to standby.

5.8 Delete an entry

- 1 Press 😷
- 2 Scroll or to the entry you want to delete and press
- and press manu.

 3 Scroll to DELETE
 ENTRY and press manu.
- 4 Display shows CONFIRM?.
- 5 Press exit to return to standby.

5.9 Delete all entries

- 1 Press menu twice.
- 2 Scroll to DELETE ALL and press menu.
- Display shows CONFIRM?.

 Press to confirm or to return to standby.

5.10 One-touch keys

The or keys have pre-stored phone numbers for one-touch dialling.

⊜ Note

The pre-stored numbers usually give you access to services offered by Belgacom. You can set the one touch keys to dial numbers stored in your handset phonebook.

5.10.1 Dial a one-touch number

- 1 Press and hold or 2.
 The number is displayed and dialled
- 2 Press to cancel the dialling and return to standby.

5.10.2 Store a phonebook entry as a one-touch number (direct memory)

- 1 Press twice.
 2 Scroll to DIRECT MEM
- and press or to select KEY for KEY 2 and press menu . The current entry, if any, is displayed.
- 4 Press menu again to open the options menu.
- Press to ADD an entry from the phonebook.
- 6 Scroll or to the entry you want. Press to confirm or to return to standby.

- 4 Press again to open the options menu.
 5 Press to select DELETE
- and press menu.
- 6 Display shows CONFIRM?.
 Press to confirm.
 NO ENTRY is displayed.

5.10.3 Delete a one-touch number

- 1 Press twice.
 2 Scroll to DIRECT MEM
- and press or to select

 KEY I or KEY 2 and

 press or The The current entry is displayed.

24 Phonebook

6 Caller ID and Call log

If you have subscribed to Caller Line Identification (CLI), and provided the identity of the caller is not withheld, the number of the caller will be displayed together with the date & time of the call.

⊜ Note

 If the caller's number is stored in your phonebook along with a name, the name will also be displayed.

6.1 Call log

The call log contains details of missed and received call. Details may include the date and time of the call. Entries are displayed in chronological order with the most recent call at the top of the list.

⊜ Note

 The call log holds details of up to 20 calls.

- When the call log is full, a new call replaces the oldest in the list.
- If you receive more than one call from the same number, only the most recent call is kept in the call log.

When you have missed calls (incoming calls that you haven't answered) the \square icon will be displayed in the display on all handsets registered to the base. If one handset is used to view the calls log, the icon on the other handsets continue to flash (multipack users only).

6.1.1 View the call log

1 Press 🔒

The most recent number – or name if stored in the phonebook – is displayed. New calls are marked with the \square icon flashing.

2 Scroll or through the calls log.

At the end of the log, you will hear a beep.

If the number has more than 12 digits, press 🛂 to see the rest of the number. Press again to see the date and time of the call.

3 Press to return to standby.

Note

Declaration of conformity

15 Guarantee terms

The Equipment you have bought has been carefully selected by Belgacom and is covered by a two-year warranty on spare parts and labor in the event of any material or manufacturing defect, unless otherwise specified. The warranty shall be valid from the date on which the equipment is collected or delivered. If you have any problems with the equipment, you should take it to a Teleboutique or to one of our authorized agents, in its entirety and in its original packaging, or in packaging providing the same degree of protection, together with the original receipt. The addresses for our Teleboutiques and authorized agents are given in the Information Section of the

White Pages.

Your equipment will be repaired or replaced free of charge, on presentation of the receipt, in the event of any material or manufacturing defect.

Belgacom alone shall determine what repairs and/or replacements are necessary.

The warranty on the repaired or replaced equipment shall end on the date on which the original warranty on the purchased equipment expires, but shall not be less than 3 months.

The warranty shall not cover:

- damage of any kind that does not predate the sale;
- any damage, faults or defects attributable to the Customer or to causes unrelated to the Equipment: lightning, power surges, humidity, accidental damage, improper use or poor maintenance, failure to comply with the instructions in the user manual, and force majeure;

 \bigoplus

 the repair or replacement of movable parts (cords, wires, plugs, aerials, etc.), consumables (cells, batteries, paper, ink, etc.) needing regular replacement and the supply of cleaning products.

The warranty shall not apply:

- to any changes or repairs to the terminal Equipment undertaken by the Customer himself / herself or through the services of persons not designated by Belgacom;
- if the Customer removes or tampers with the manufacturer's serial numbers and / or brand names on the terminal Equipment.
- Belgacom shall not be liable for any indirect or immaterial loss sustained by the Customer as a result of the malfunctioning of the terminal Equipment, such as any loss of production, revenue or contracts.

The General Terms and
Conditions for the Sale of
Terminal Equipment can be
obtained on request from any
Belgacom service available to
the public or at
