Customer Case Study

About Inet

Inet is part of the Alpega Group, a leading global logistics software provider with an ever-growing portfolio of end-to-end solutions covering all transportation needs, including Transportation Management Systems (TMS) and the largest Freight Exchange in Europe.

Inet has +/- 190 employees mainly located in Austria and Germany with satellite offices in the US, China and Thailand.

What

Consolidation of IT infrastructure into the Azure Cloud.

- Migration of Windows File, Print and AD Services
- Rehosting of Citrix Virtual Desktop environment to Azure
- Implementing Azure Hybrid capabilities for the management of on-premise proximity services.
- Integration of Private and Public connectivity and security into the Azure platform

Benefits

As a company that turns logistics into a competitive advantage, Inet extends its mission statement towards its IT strategy. Migrating to Azure allowed Inet to significantly reduce the footprint of their on-premises IT landscape and provides a common platform accessible by their users located in different continents.
